

Part of the Flyte Microsoft 365 App Suite

Asset Management App

Digitally Transform Your Asset Management Process

Efficiently Track and Manage Organisational Assets

Tracking the location and condition of physical assets can be a difficult and time consuming process, especially when employees are working in different locations.

Built leveraging Microsoft Power Apps and Microsoft SharePoint, the Asset Management App allows your organisation to keep a digital record of all physical devices, and the activity relating to each asset. This makes it easier to allocate resources, plan for projects, and ensures employees are held accountable for the condition of the devices that they use.

Keep a Digital Record of Organisational Assets

Easily check in and check out assets

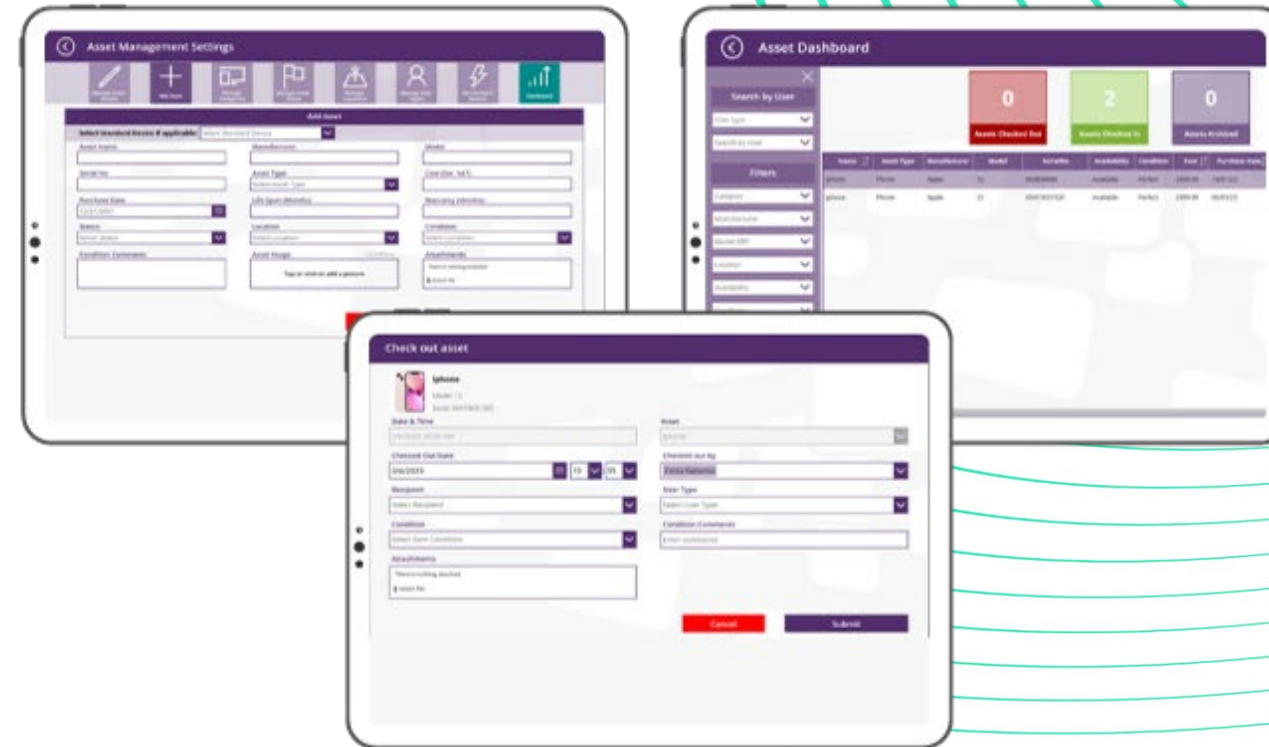

View the activity history of each asset

Quickly add new assets to the system

Filter assets by customisable categories

Easily track the condition of each asset

Available on desktop or tablet
